Performance Notes

s.p. = sul ponticello, play with the bow near the bridge

m.s.p = molto sul ponticello, play very near the bridge

s.t = sul tasto, play with the bow near the fingerboard

ord. = ordinario, play with unaltered bow position

= natural harmonic, producing the notated pitch

= snapp pizzicato, pluck the sting upwards so that it collides with the fingerboard while vibrating

= unique noteheads are found only on the final page, and are accompanied by further explanation where they occur

= a two-line ossia staff above a string instrument indicates bow pressure and speed, with the top line representing extreme bow pressure and very slow bow speed, and the bottom line representing normal play; the sound produced should be a harsh "scratch tone," with little to no audible pitch

quarter tones:

the purpose of quarter tones in this piece is to contribute to a sense of tonal instability, rather than to indicate very precise pitches; in general, prioritize musical phrasing and flow over precision of pitch when it comes to notated quarter tones
