Program Notes:

Ephemeris is a musical work inspired by NASA's recent Artemis II Mission. While observing the mission, I began to think about the differences between humans' sensual and intellectual perceptions of celestial bodies; our senses reveal the sun and moon – our most perceivable celestial neighbors – as small and slow-moving, but through centuries of science, we have come to understand that they are, in fact, very large, and travelling at enormous speeds. This piece musically charts a human's process of rationalizing what we can perceive through the senses, with what we know to be factual – balancing internal and external sources of truth and knowledge.

Performance Notes:

General:

feathered beaming should sound organic and free.
more beams indicate a more dramatic increase or decrease in speed

Bass Flute:

bend pitch down by approx. 1 half step by adjusting embouchure angle

Trombone:

flutter tongue: primarily to add texture, medium to high rate with minimal obstruction of airflow

Vibraphone:

laissez vibrer ties, accompanied by pedal markings when bowed, indicate that the player should allow the note to ring until the next indicated pedal marking (or until the next notated pitch, if played with mallets).

Violin:

sp – sul ponticello

mso – molto sul ponticello

st – sul tasto

clt – col legno tratto

clb – col legno battuto

artificial harmonic glassando: gliss both the anchored finger and the touching finger, maintaining the interval of a perfect fourth (this technique is only used with touch-fourth harmonics)
